

SOFTWARE ENGINEERING LAB 2

Name : Harsh M

SRN : PES1UG24CS573

CLASS : 5-J

SCREENSHOTS:

Sprint 1:

1. :

2.

Added story points:

3. Sprint board:

4 . Burndown report:

SPRINT 2:

The screenshot shows a Jira interface with a Backlog view for 'BBSIM board'. The backlog shows two work items: 'BBSIM-5 Flag Expiring Blood Units' and 'BBSIM-6 Track Donor Response'. The 'Flag Expiring Blood Units' item is selected, showing its details in the right-hand pane. The left-hand pane shows the 'BBSIM board' with a search bar and filters. The right-hand pane shows the 'Flag Expiring Blood Units' item details, including a description, subtasks, linked work items, and a 'Quickstart' button.

The screenshot shows the Jira interface for the 'BBSIM board' in the 'BLOOD BANK SYSTEM AND INVENTORY MANAGER' space. The 'Backlog' tab is selected, displaying a list of work items. A sidebar on the left contains navigation options like 'For you', 'Recent', 'Starred', 'Apps', 'Plans', 'Spaces', 'Filters', 'Dashboards', 'Teams', 'Goals', 'Projects', and 'Customize sidebar'. The main content area includes a search bar, version and epic filters, and a 'Plan your sprint' section. Below this, a 'Backlog (3 work items)' section lists three items: 'BBSIM-5 Flag Expiring Blood Units', 'BBSIM-6 Track Donor Responses', and 'BBSIM-7 Secure Data & Prevent Double-Allocation'. Each item has a 'Blood Bank Inventory & Emergency Donor Matcher' link and a 'To Do' status. The bottom of the screen shows a Windows taskbar with a search bar and various application icons.

Sprint in progress:

The screenshot shows the Jira interface for the 'BBSIM board' in the 'BLOOD BANK SYSTEM AND INVENTORY MANAGER' space. The 'Active sprints' tab is selected, displaying a Kanban board with four columns: 'TO DO', 'IN REVIEW', 'IN PROGRESS', and 'DONE'. The 'IN PROGRESS' column contains three items: 'Flag Expiring Blood Units', 'Track Donor Responses', and 'Secure Data & Prevent Double-Allocation'. Each item has a 'Blood Bank Inventory & Emergency Donor Matcher' link and a status of 'In Progress'. The bottom of the screen shows a Windows taskbar with a search bar and various application icons.

QUESTIONS:

1. Did your estimations reflect the actual effort?

Yes, assigning higher points to the donor matching algorithm (8 points) accurately reflected its complexity compared to the much simpler inventory view (3 points).

2. Was your backlog well-prioritized?

Yes, the core functional requirements like emergency requests and matching were prioritized first since they deliver the highest immediate value to the end user.

3. How did your simulated sprint align with your plan?

It aligned perfectly. Moving the items sequentially through the workflow simulated a smooth execution with zero scope creep.

4. What insights did the burndown chart give about your team's capacity?

The chart showed a steep, vertical drop because all tasks were moved to "Done" simultaneously for the simulation. In a real sprint, this indicates work should be spaced out to maintain a steady burndown rate rather than closing everything on the last day.
